### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 34 is amended as follows:

After the first line, a limitation is added, "a computer processor;"

The limitation beginning on the original fifth line is amended to "a control module executed on the computer processor configured to create..."

Authorization for this examiner's amendment was given in a telephone interview with Attorney Stephen Jensen on 21 July 2005.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 May 2005 has been entered.

2. In response to the first office action, claims 28 and 34 have been amended and claims 30, 31, and 37-53 have been cancelled. Claims 28, 29, and 30-36 have been examined.

### ***Allowable Subject Matter***

3. Claims 28, 29, and 32-36 are allowed.

4. The following is an examiner's statement of reasons for allowance:

In each independent claim, no art could be found wherein the transaction for determining the password in the setting up of a new calling-card-derived temporary

network account is performed entirely over a connection other than that used by eventual network account.

Some of the closest art, the "Monkey Technical Overview" (see IDS filed 23 May 2000), sets up a password for a temporary account, but the user request is sent over the network account connection. This is also the case in as well as U.S. Patent No. 6,075,860 to Ketcham and U.S. Patent No. 5,949,882 to Angelo.

U.S. Patent No. 5,265,155 to Castro and U.S. Patent No. 6,795,852 to Kleinrock et al. disclose the construction of an account using an external connection, but do not suggest any password exchange.

U.S. Patent No. 5,749,075 to Toader et al. discloses the use of a temporary account with a PIN, but the PIN is initially issued and not changeable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
